EAT YOUR WEEDS
Wednesday 11 September

ALL ABOUT GARDENING AUGUST
Monday 5th 7pm & Tuesday 6th 9.45am
Ruud Kleinpaste (Monday evening only)
Ruud Kleinpaste is a Dutch-New Zealand naturalist and host of the Animal Planet series Buggin’ with Ruud.
In 2018 Ruud was appointed an honorary Member of the New Zealand Order of Merit for services to entomology, conservation and entertainment.

Luke Martin (Tuesday morning only)
Luke Martin is Curator of Native Plants at Christchurch Botanic Gardens. He will talk about growing and propagating native plants.
Both talks are followed by Gardening Half Hour with Michael Coulter.
The Kiosk, Christchurch Botanic Gardens (just over the footbridge from the Armagh St car park).
$5 members $10 non-members
Includes tea, coffee & biscuits
EAT YOUR WEEDS WORKSHOP

**Wednesday 11 September - Presented by Cathy Bouma, Tuahwi Botanicals**

Presenter Cathy Bouma will teach you the best way to taste plants safely and talk about what to do with these weeds (other than throwing them in your compost heap!).

Cathy loves making herbal pesto with all sorts of different herbs and weeds, and will discuss the various ingredients that go into making a pesto and how to make it nut free, dairy free etc. She will also demonstrate how to make some simple pestos using weeds and herbs and provide recipes sheets.

As herbal teas are her passion, she will have some fresh herbal teas to taste using common herbs from the garden.

**Cost:** $25 (includes GST)

**Bookings close:** Friday 6 September

**Book online:** [www.chsgardens.co.nz/eat-your-weeds-workshop](http://www.chsgardens.co.nz/eat-your-weeds-workshop)

**Presented by Cathy Bouma of Tuahwi Botanicals**

HERB OF THE MONTH
Coriander - Coriandrum sativum

Coriander has been cultivated in Mediterranean countries for over three thousand years. It is mentioned in all old Greek medical texts and early scriptures and is now well known and used in New Zealand.

The name is derived from koris, which is Greek for bed-bug, as the plant smells strongly of the insect! In Spain and the Americas it is known as cilantro.

Coriander is easy to grow and can become a weed in areas of dry soil and sunshine. A hardy annual around 30 - 60cms, with a solid stem and a thin pointed root, it has small flat compound heads of white to reddish pink flowers from mid Summer to early Autumn followed by brownish small fruit. The latter smells awful until ripe, when it becomes pleasant and spicy.

Sow seeds in early Summer. They may be slow to germinate and will need thinning out.

Coriander leaf is one of the most widely used flavouring herbs throughout the world today. Folk either love or hate the flavour!

Buy a bundle for use from a supermarket, plant the roots and grow your own and let it seed! Dried ripe fruit is used in baking, as a condiment, and in liqueur. The root can also be cooked as a vegetable.

Horticulture Course - Starts Thursday 29 August 2019

Thursday Evenings: 5.30pm – 7.30pm
The Kiosk, Christchurch Botanic Gardens

A five week 6 session course covering Weeds, Lawn Care, Plants for Garden Design, Propagation, Plant Parts and Functions and Botany

Includes one practical session on Saturday 14 September at Waitakiri Primary, Burwood.

Learning Outcomes:
Weeds: This topic will look at identifying a range of common and lesser known weeds found in New Zealand Gardens. Discuss chemical and cultural control methods.

Lawn Care and Maintenance: Practical session covering lawn preparation using both grass seed and ready lawn. Fertilising, mowing, weeding and irrigation will be discussed.

Plants used in Garden Design: A basic introduction to some important elements of garden design and selecting the “right plant”. Students will be familiar with range of plants by end of course.

Propagation: Seed sowing. Demonstration of ‘sexual propagation’. Students will sow seeds using appropriate growing media and care for seedlings for duration of course.

Plant Parts and Functions: Botany. The different roles that flowers, leaves, roots etc play in plant survival.

Cost: $150 per person
(10% discount for returning students)
Registrations close: Friday 23 August
Book online: www.chsgardens.co.nz

FROM THE PRESIDENT Ray King

Winter is almost over and Spring is just around the corner. I hope you all enjoyed browsing through the catalogues and choosing your seeds etc... for the coming planting season. Clip the Oderings voucher on the right (or save a photo to your phone) and present it at any Oderings store for a great gardener’s discount.

Both Sandi MacRae and Allan Paterson have resigned from the board of the CHS. I would like to thank them for their efforts over the past years and wish them well in their new enterprises.

School holidays saw us being part of KidsFest for the first time. Many of our members volunteered to help with the programme and we certainly had fun. On a busy day it was hard to move in the Kiosk! There was plenty of creativity displayed by both children and parents, who seemed to enjoy joining in. Thank you helpers.

The kitchenette for The Kiosk is slowly progressing with the plans soon to be submitted for consent.

There are a great range of events coming up so keep an eye on the newsletter and online so you don’t miss out on anything.

Next month you can learn how to make yummy use of the weeds in your garden.

In November we have our biennial Margaret Watling demonstration with an exciting floral artist coming to us from Takapuna; her work looks amazing.

MONTHLY TIPS & TASKS Michael Coulter

August is a month when we notice the days are getting longer and the weather’s changeable, but we still turn our thoughts to the coming Spring.

Green house owners can start sowing seeds to have plants ready to plant out next month.

Pruning fruit trees, roses and other deciduous trees and shrubs are the main tasks to be done this month. Stone fruit trees should be now treated with copper sprays 2 to 3 times before flowering to control leaf curl and brown rot. Primulas and polyanthus will benefit from a dressing of blood and bone to help improve the flowers. Other annuals should be kept weed free and old flowers removed. Spring flowering bulbs are shooting through the ground, so when weeding, be careful not to damage them. Potatoes may be planted later in the month in warmer areas or under cover.

Some perennials may be split up or cuttings taken to renew the plants in the garden. Soon, begonias and dahlias will begin to become active. If they are inside a green house, when they are long enough new cuttings can be taken.

Lawns still look untidy but they will start to grow once the weather gets warmer later in the month. The first cut should not be too low. There is a lot to look forward to in the Spring but dependent on the weather, it is better to be patient and wait until the weather is more settled to really begin the Spring work.

Good gardening. Michael Coulter

COMING UP AT ALL ABOUT GARDENING

SEPTEMBER

Monday 2nd 7pm & Tuesday 3rd 9.45am

Greg Byrnes from Te Kohaka Trust on regeneration.

Followed by Gardening Half Hour with Michael Coulter

The Kiosk, Christchurch Botanic Gardens (just over the footbridge from the Armagh St car park).

Members: $5 Non-members: $10

Tea, coffee and biscuits included

Greg Byrnes has been involved in a number of voluntary organisations and political causes over the years and is a passionate advocate for the environment. His career objective is to utilise his knowledge and experience to influence; and bring about change in the way New Zealanders engage with nature and conservation.

He has worked for many local, regional and central government agencies in Australasia during his career in the environment, parks and recreation management. He has also worked in horticultural roles at the Christchurch and Brisbane Botanic Gardens, Centennial & Moore Park Trust and Sunnyside Hospital.

In November 2010, he was appointed to his current position as General Manager at Te Kohaka o Tuhaitara Trust.

In 2017 he was awarded a Canterbury Horticultural Society ‘Outstanding Horticulturalist’ award for his contribution to horticulture.
